The Performance Revolution™

Harken Sport — the Performance Revolution™

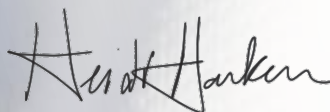

Harken Sport was born from the strong principles and ethics of Harken sailboat hardware: Produce the best products at a fair price, service your customers beyond their expectations, never lose your sense of right or wrong, innovate at a relentless pace, and respect the beautiful planet we live on.

We begin by choosing partners that practice clean manufacturing and produce products that meet our uncompromising standards of quality and performance. Next we select and develop our textiles, often making choices not considered by other brands because of their technical nature and degree of difficulty to work with. Then we carefully design every Harken Sport item, focusing on fit, comfort and innovative features – right down to the stitching.

The result is a line of revolutionary products you won't find anywhere else, that perform like nothing you've ever owned – backed by a commitment to customer service that will never leave you high and dry.

We invite you to experience our Performance Revolution. Our motto at Harken Sport is simple, if we can't do it better, we won't do it at all!

"Packing our products full of features reduces the amount of items our customers have to buy to get the performance they're looking for. Add our passion for clean manufacturing and greener fabrics, and you can imagine how we can help reduce our carbon footprint. Cleaning up our planet after the damage is done is a lot tougher than doing the right thing right now."

Heidi Harken, Manager

"We believe in putting the customer first, and providing a hassle-free experience. Our team is 100% committed to exceptional quality, in the products we sell and the way we stand behind them. We want our customers to enjoy doing business with us as much as they enjoying using our gear. Around here, serving our customers comes before eating and sleeping."

Skye Middleton

Director of Sales & Marketing

Sun protection? We've got you covered.

Cool, comfortable UV protection, from sea and shore to city sidewalks.

Superior sun protection and quick-drying comfort come together in this soft, breathable UV shirt. On the boat or portside, you're protected at UPF 30. Temperature-regulating bamboo charcoal infused polyester fabric wicks moisture from the skin and is naturally anti-microbial to resist odor. Athletic fit, 2-way stretch and smooth, no-chafe seams in friction zones give you maximum freedom of movement.

HARKEN SPORT TECHNOLOGY

Polyester with anti-microbial Silvercare and Clariant Moisture Management. Silver kills bacteria and neutralizes the odor causing ammonia and proteins in sweat. The hollow fibers of bamboo charcoal quickly disperse moisture.

Stowable
squall hood

A.

Men's Softshell Jacket

Three layers of weather-resistant performance. The Teflon® treated 2-way stretch outer layer repels wind and water. The waterproof bonded membrane and taped seams keep you dry. Softshell fleece insulation regulates body temperature. When a squall comes up, so does the detachable hood.

Technology for every purpose under the sun. Or the stars.

Wherever you find adventure—on the high seas or a casual night out on the town – be prepared. Cool nights. Wind. Rain. And everything in between. Breathable layers to regulate body temperature. Moisture control to keep you dry. Stretch fabrics that move with you. Abrasion protection where you need it. Don't give it a thought. We already did.

HARKEN SPORT TECHNOLOGY

For our Alpine Fleece, we blend 100% Sherpa wool fleece and polyester fleece into a wool-like material with the benefits of both. The outside bonded fabric is polyester with Teflon®.

Performance. We'll go to any length.

A.

Men's Moda Fleece Jacket

This is the warm, lightweight sport fleece you've been looking for. Breathable, moisture-wicking nylon/spandex vent panels under the arms cool down hot zones. Mesh lining in sleeves for easy on/off. Long, athletic fit for easy layering. 140g fleece.

Collar features high-stretch neoprene outside with Lycra inside. Slips easily over the head.

UV and anti-fog watch window

Hyperseal™ Pro 3-Layer Bibs

Our lightweight Hyperseal™ Pro 3-layer stretch fabric gives you maximum mobility without the bulk – even the loop on the ankle cuff stretches! Reinforced panels in the articulated knees protect against abrasion. Internal neoprene cuffs keep out water and accommodate short or tall boots. Easy on/off with quick-release straps and full zip to crotch, with an interior baffle to keep the water out. And we gave you a welded-on pocket for your goodies. Once again, Harken raises the bar. Teflon® treated polyester, bonded with PU membrane and tricot.

XS, S, M, L, XL, XXL

E. 2278 Ice/Carbon/Black

E.

Hyperseal™ Pro. The name pretty much sums it up.

We took a Teflon® coated shell, bonded it to a polyurethane membrane and a brushed tricot lining to create a 3-layer fabric that seals out wind and water 100% – yet is soft, breathable, and UV stable. Neoprene cuffs finish the job. Unique 2-way vertical stretch provides mobility. This is pro-level protection all the way.

HARKEN SPORT TECHNOLOGY

FRAMES are tough, flexible nylon Grilamid® or Grilamid® and Megol rubber (Grinder models 2090, 2091).

LENSES are polarized and block 100% of UVA, UVB, UVC rays. Distortion-free polycarbonate.

1. **Hydrophobic coating** repels water, resists water spots, eases cleaning.
2. **Anti-reflective coating** reduces glare from sun and water.
3. **Anti-scratch layer** to reduce lens damage, preserve optical clarity.
4. **Distortion-free , Impact-Resistant Lenses** with the optical center placed in front of the eye for clarity
5. **Polarized** to block 100% of UVA, UVB and UVC rays, absorb 99% of reflected glare.
6. **Flash mirror coating** further reduces reflected light entering lens (not available on Sport models 2474, 2572)

TPU Coated Waterproof Fabrics ❶

PVC may be cheap to manufacture, but it doesn't age well and it's toxic for the environment. TPU costs twice as much, but is stronger and more durable, UV-resistant and abrasion-resistant – and much easier on the environment. We use TPU, not PVC, as part of our commitment to better products and a smaller carbon footprint.

Colorfast, UV-Resistant Impregnated Nylon ❷

Harken® bags carry a higher UV rating than our competitors' so you'll have a bag that wins the never-ending battle against sun, salt, temperature extremes, fading and delaminating.

Radio Frequency Stitch-Free, Weld-Seam Waterproof Construction ❸

Seams on a Harken® bag aren't stitched, they're welded with our high-frequency technology. Features that require stitching, like pockets and straps, are stitched to an added panel, which is then RF-welded to the bag. Harken's solid construction requires extra material and layers, but when we say waterproof, we mean it.

Roll-Top Closure for a Watertight Seal ❹

The best way to achieve a fully waterproof closure system is to use a rolltop, with the TPU fabric sealing against itself. Bags with zippers – even a waterproof zipper – will have a small gap at the zipper end where water can get through. Where we need to keep your gear dry, we use a rolltop system. It's a small detail, but it's details like this that set Harken® apart.

Water-Resistant YKK® Zippers ❺

A product is only as good as its zippers, so we use the best. YKK's water-resistant zippers have a weather-shielding binding that keeps water out. Since water can enter at the end of any zipper, we keep our zipped pockets welded outside the bag or on our water-resistant bags, which are not meant to be submerged.

Taped Seams ❻

All stitched seams are sealed with high-quality seam tape. Seam tape is applied beyond the tiny needle holes, keeping water well out of reach.

Air Purge Valve ❼

This is a luxury add-on that saves time and hassle. Instead of having to open and close and try to bleed air from the bag, you simply turn the valve and compress the bag, keeping your items in place. Conversely, if you want air in the bag, just blow into the valve. Could it be any easier?

Remember the old days, when keeping your gear dry was a lost cause?

If keeping water at bay and your bag from being decimated by the elements is an art, every Harken® bag is a masterpiece. From our fabrics, coatings and welded construction to our zippers and roll-top closures, we don't miss even the smallest detail. Harken® continually redefines waterproof technology. Want dry gear and durable, long-lasting good looks? Invest in a work of art.

A.

Rogue Waterproof Backpack

Harken® redefines the backpack. The TPU-impregnated nylon is waterproof, abrasion and stain resistant, and colorfast. The roll-top closure provides a waterproof seal, and the air-purge valve allows easy compression. You've got two exterior pockets for water bottles, two internal storage pockets, and an elastic cord to stow your jacket. The back is padded, ventilated and non-abrasive. Waist, chest and shoulder straps are adjustable for custom-fitted comfort. What's more, your laptop will be tucked into a padded, elevated sleeve, so it won't hit the ground when you set your bag down. So much for roughing it.

Size: 64 X 36 X 16 cm, 37 Liters
A. 2284 Black/Carbon

Pictured: Rogue Waterproof Backpack with attached Waterproof Waist Pouch

Waterproof Waist Pouch

You can wear it as a single roll-top waterproof compartment, or attach it to the front of the Rogue Backpack as accessory storage. Like it's big brother, it's TPU-impregnated to resist water, abrasion, stains and fading.

Size: 19 X 20 X 8 cm, 3 Liters

***The perfect place
to stuff your stuff.***

A.

Roll-Top Wet/Dry Bag

It's the most versatile bag you can own – a full-length waterproof bag to protect gear from rain, sea spray and submersion ... a full-length breathable mesh bag for wet gear ... or a combination of both. The roll-top closure and welded seams provide a watertight seal. The air-purge valve allows easy compression. The exterior mesh drying compartment expands as you need it. Made from lightweight, TPU-impregnated nylon.

Size: 38 X 18 X 79 cm, 54 Liters
A. 2019 Grey/Black

B.

Medium Squall Bag

On the water. On shore. Getting your exercise gear from the office to the gym. This is the medium-sized, all-weather, all-purpose bag to grab and go. It's made of tough, PVC-free nylon. Waterproof and watertight, with abrasion-resistant rounded edges to keep it good-looking for a good, long time – even after sitting in water.

Size: 55 X 28 X 29 cm, 45 Liters
B. 2581 Grey/Black

Exterior mesh drying compartment expands

You couldn't find better traveling companions.

C.

Transition Backpack

One minute you're on the boat, the next minute you're on the road. Separate compartments keep everything from miscellaneous gear to sunglasses and keys in its place. There's a laptop pocket, dual water bottle pockets, a ventilated mesh compartment for shoes and wet gear, and a cell phone pocket in the shoulder strap. Plus a bungee for your jacket. Get packin'.

Size: 48 X 34 X 15 cm, 24 Liters

C. 2264 Gray

D.

Packlite Backpack

This the way to travel light. Soft, lightweight and water-resistant, the Pack-Lite has 3 compartments for storage. Folds into a compact, self-storing pouch when not stuffed with your stuff.

Size: 46 X 35 X 20 cm, 32 Liters

D. 2274 Black

E.

Rolling Duffel

The travel bag for any destination. It's large enough for all your gear, with multiple interior compartments and exterior pockets – even an expanding end pocket to separate wet or dirty items. Made of ripstop nylon, with heavy-duty wheels, a telescoping handle, carry straps and end grab handles. Even a bottom wheel cover to protect the deck. You're ready to roll.

Size: 76 X 36 X 36 cm, 98.5 Liters

E. 2580 Grey/Black/Red

Harken's One-Way Drainage System: Full-length 9-point drainage system drains water away from the foot through a series of internal channels in the sole. Our one-way system prevents water and debris from reentering the shoe through the drainage ports.

Harken's Patent Pending Radial Traction Zones: 360-degree pattern of siping allows siping flexion of the sole in all directions. This pattern is placed under the 3 main pressure zones of your foot to give each area independent traction. The sipes expand and contract expelling water for superior traction, while escape channels push water out from under the sole, giving you maximum contact with the deck surface. Used in combination with a special rubber compound, traction is greatly increased.

Anti-bacterial Silver-Woven Footbed: Silver's inherent properties neutralize odor-causing bacteria. Unlike spray-on finishes that wash away, silver threads woven into the insole reduce odor for the lifetime of your shoe.

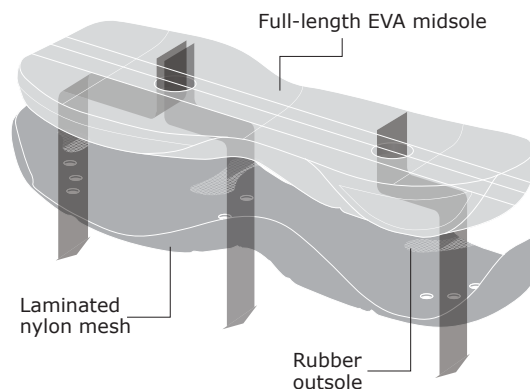

Integrated Neoprene Collar: Stretch collar replaces shoe tongue for a quick, comfortable fit.

Lace Protector: Neoprene cover retains lace ends to prevent snagging.

Quick-Drying Materials: Synthetic materials manage moisture by dispersing it over a large surface area to dry. Low-absorption, layered mesh increases air circulation for a cool, dry foot.

Stabilization Track: Controls ankle and foot rotation while maintaining freedom of movement by providing increased deck contact. Our wider toe box further stabilizes the shoe.

Active Support: Support under the arch of your foot reduces strain on the plantar fascia, heel, back, and knees. Molded heel cup provides comfort and stabilizes the foot, while metatarsal support aids in balance.

The measure of a man. And a woman.

The difference between men and women extends all the way to the tips of their toes. Men and women have different foot structures, and we make this distinction a priority when designing every Harken shoe. So while our men's and women's sailing shoes may share the same next-generation performance technology, the patterns, sizing and fit are custom-tuned to your chromosomes. It makes a difference. And you can feel the difference it makes.

The next generation of performance sailing shoe.

Naturally, it's from Harken®. Radial Traction Zones have a full 360° siping pattern, giving each key area of the foot independent traction. Our One-Way Drainage System sends water out at nine separate points – but won't let it come in. We gave it a tough exterior and a mesh interior with unique heel ports for even faster drying. Active arch support provides comfort and reduces strain. The molded heel cup acts as a shock absorber. Safety. Comfort. Protection. With Hydroflux, you've got it all.

Performance for every inch of a foot.

High tech for the high seas.

Topside, this is obviously a great-looking, quick-drying, mesh deck shoe. It's what you don't see that would knock your socks off, if you were wearing any. Inside, all-day arch and metatarsal support, and a shock-absorbing heel – plus an odor-preventing footbed. Down under, the sole of Vortex, with our 360° deck-gripping Radial Traction, One-Way Drainage System, and Stability Track to control ankle and foot rotation.

Tomorrow's tradition.

UK	6	6.5	7	7.5	8	8.5	9	9.5	10	10.5	11	12	13
EURO	40	40.5	41	42	42.5	43	44	44.5	45	46	46.5	48	49

High style meets high tech in our Classic Leather deck shoe.

We took traditional styling and infused it with our One-Way Drainage System, active arch support, shock-absorbing midsole, and radial tread pattern for grip in all directions. It's waterproof genuine leather on the outside, quick-drying on the inside, with a silver-woven footbed to kill odor-causing bacteria. A timeless classic just took a giant step into the future.

You'll flip over these flops.

A flip flop with enough grip for light work on a wet deck yet perfectly suited for everyday wear? A flip flop with orthotic-quality support from heel to toe? Take it off your wish list and put Antigua on your feet. Radial Traction Zones give you grip. Stability Track controls ankle and foot rotation while providing increased deck contact. Anti-bacterial footbed prevents odor. Padded straps prevent chafing and the rubber toe cap shields against stubbed toes. This is one great-looking, hard-working pair of flops.

Leave it to Harken to create a performance sandal.

From the boat to the beach, or all ports of call, our Beachcomber II sandals will get you there in style. More importantly, they're packed with Harken® performance technology. The 3-part multiple density sole provides orthotic-quality support, while the 360° Radial Traction Zones give you greater footing on any surface. They're lightweight and quick-drying, with padding under the straps to prevent blisters. And they float. So you'll actually have these sandals a while.

Vortex

Hydroflux

Classic

Harken® introduces the H2000 boat shoe in 1985.

Designed by sailors, for sailors.

We pioneered the athletic sailing shoe. We didn't just adapt a sport shoe, we designed every last detail to address the rigorous demands of the water. They're made of materials that dry exceptionally quick, with cooling ventilation, and anti-microbial linings to control odors. We created a contoured midsole that gives orthotic-quality support to arch and heel that is literally a lifesaver for your feet. But what's really going to grab you is the incredible holding power we've engineered into the sole. You won't believe the grip, the drain system, the traction when twisting and turning on a wet deck. And if they can do all this on the water, imagine how they'll perform on mere land.
